Repairs and Maintenance Procedure

Purpose of the Procedure
To ensure that repairs are accurately recorded and arranged in a timely manner.

Notes
This procedure is based on access to the following:

- Property Management computer software has an ability to generate a work order for the repair contractor. If no facility exists in the software, then a manual work order, (in duplicate) should be generated.

- Property Management software that has a computerised diary facility attached to the properties under management. If no computerised diary facility is available, action steps and conversations should be recorded in the relevant paper based files.

- The timing of the various action steps in this procedure is based on SA Residential Tenancy legislation.

- There are references in this procedure to specific staff members in relation to specific activities. In some agencies, these roles may be performed by another member of staff or the title may be different.
